

Roof Exhaust Fans

Grain Aeration System

Protect Your Grain, Anytime, Anywhere.

The SAFE-GRAIN power roof exhaust fan is designed to sweep moisture laden air from the underside of bin and silo roofs before condensation can occur. Roof exhaust fans and makeup air gravity vents allow the exhaust fans to move additional air under the bin roof. The additional air provides a sweeping effect to remove potential condensation from the underside of the silo roof. Exhaust fans are often run without main fans on hot and humid summer days to prevent condensation.

692 NOTCHED SERIES
Fits over the roof rib.

699 TAPERED SERIES
Fits between the roof ribs

690 FLAT ROOF SERIES
