## Grain Temperature Monitoring System

**Monitor Your Grain, Anytime, Anywhere.**

SafeTrack is a complete solution for monitoring your commodity temperatures. The SafeTrack system provides simple, accurate and fast grain monitoring. Data scanning, analyzing, reporting and archiving is quick and easy.

### SafeTrack in action

Easiest to use scanning and reporting.

Clear graphics for at-a-glance analysis.

Wireless radio options greatly minimize conduit and installation costs.

Expandable to any size system. Modular components make servicing and future expansion a snap.

Scanning over the Internet is easy and seamless.

SafeTrack systems are installed worldwide.

SafeTrack software is offered in many languages.

- Extremely rugged thermocouple cables
- Digital signals for accuracy and reliability
- Ohms testing for cable integrity check
- Detailed audit trail

- Grain level and volume measurement
- Graphing to plot temperature trends
- Manual and scheduled scanning and reporting
- Automatically email reports or display on web
