

SafeTrack

Grain Temperature Monitoring System

Monitor Your Grain, Anytime, Anywhere.

SafeTrack™ is a complete solution for monitoring your commodity temperatures. The SafeTrack system provides simple, accurate and fast grain monitoring. Data scanning, analyzing, reporting and archiving is quick and easy.

SafeTrack in action

Easiest to use scanning and reporting.

Clear graphics for at-a-glance analysis.

Wireless radio options greatly minimize conduit and installation costs.

Expandable to any size system. Modular components make servicing and future expansion a snap.

Scanning and monitoring over the Internet is easy and seamless from a PC, Tablet, Phone and Android App.

SafeTrack systems are installed worldwide.

SafeTrack software is offered in many languages.

- Extremely rugged thermocouple cables.
- Digital signals for accuracy and reliability.
- Ohms testing for cable integrity check.
- Detailed audit trail.
- RadarTrack™ integration for continuous grain level and volume measurement.
- Manual and scheduled scanning and reporting.
- Automatic email alerts and reports.
- Remote monitoring from any web browser or Android App.
- Relay Control Modules for automatic exhaust fan control and PLC interfacing.
- Modbus (ASCII) for direct scanning with a PLC.

SafeTrack

Grain Temperature Monitoring System

SafeTrack Software

A clean and simple interface makes scanning your bins effortless.

- Easy to read graphics show status and problems at-a-glance.
- Easy and flexible reporting with automatic email options.
- Approximate grain level display and exhaust fan control.
- Run SafeTrack manually or automatic, locally or remotely over the Internet for anytime-anywhere monitoring.
- Remote monitoring with any web browser or Android app.

SafeTrack Radios

Significantly reduce installation costs by using radios to link the Scanners to your PC. Advanced MESH technology for reliability.

- Fully licensed (FCC, IC, CE) for use worldwide.
- 900 MHz and 2.4 GHz models are available.

SafeTrack Scanners

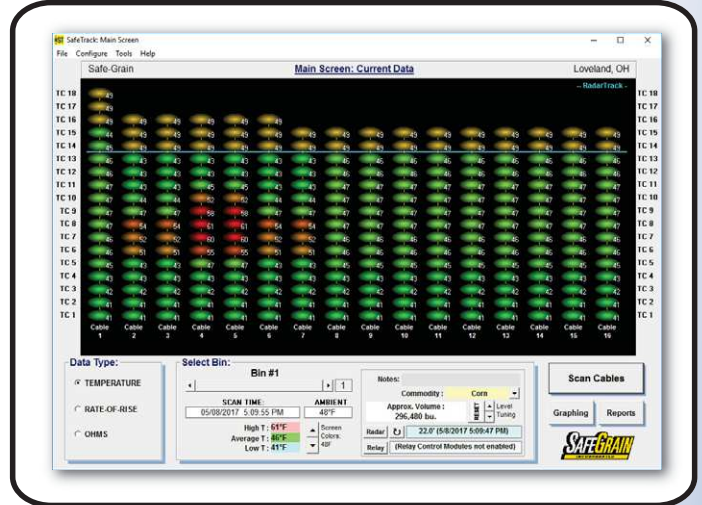

Connect temperature cables to a SafeTrack Scanner and begin monitoring right away. SafeTrack Scanners are easily adapted to most existing temperature cable systems.

- Up to 43 temperature cables per Scanner.
- 64 Scanners provide a 2752 cable system capacity.
- NEMA 4X rated weatherproof enclosure.

SafeGrain Temperature Cables

Accurate, rugged, reliable and time-proven thermocouple cables provide the core of the SafeTrack system.

- Up to 18 thermocouples per temperature cable.
